

Bike Share at PLTS

Meet our three lovely bikes!

Drum roll,
please...

Blue Adventures

- Blue Adventures is currently our shortest bike
- Thinnest wheels, good for a city/paved ride.
- Keep the **tire pressure** between 35-50 PSI

Marin Spirit!

- Marin Spirit has the most school spirit, with three PLTS stickers.
- Marin Spirit is slightly taller than Blue Adventures.
- This bike has wheels with good traction for a mountain ride, or for a city ride!
- Keep the **tire pressure** between 40-60 PSI

Jamis Durango

- Jamis Durango is our tallest bike.
- The traction on Jamis Durango's tires is worn; best for a paved path.
- Jamis Durango has the least school spirit, with zero PLTS stickers, for days you wish to ~ride~ under the radar. This may be changed in coming months. 😊
- Keep the **tire pressure** between 65-80 PSI

When riding bikes, make sure to...

- **Give the tires a little squeeze.** If they are squishy, they are thirsty for air. Please give them the recommended PSI before riding, or call the bike attendant to do it for you: (480) 262-1410
- **Lock them up!** When you're out on the town, make sure to lock up the frame of the bike (the sturdy, metal body), not just the tire.
 - Also, after locking, move the code gears around so it is not easily unlocked.
- **Wear a helmet** (Each bike comes with a helmet)
- **Have fun**, feel the wind on your face. <3

Happy trails!
